SUMMARY

Software Engineer with hands-on experience building scalable and secure backend systems , Research contributor with multiple paper acceptances in international conferences and journals, SIH 2024 National Semi-Finalist, and active competitive programmer with 300+ DSA problems solved.

TECHNICAL SKILLS

Languages: Go (Golang), Java, SQL, HTML, CSS, JavaScript,
Backend: REST APIs, JWT, OAuth, Middleware Design, PostgreSQL, MySQL
Tools/Platforms: Git, GitHub, Docker, Linux, Firebase, Postman
CS Fundamentals: DSA, OOP, DBMS, OS, Computer Networks

EXPERIENCE

Remotestate Jan 2026 – Mar 2026
Software Development Engineer Intern Noida, India

- Engineered 12+ REST API endpoints in Go handling concurrent requests; reduced latency from 400ms to 280ms via optimisation.
- Designed role-based PostgreSQL schemas and optimized backend workflows with composite indexing, reducing query time from 800ms to 250ms under load.
- Integrated OAuth and Firebase services; maintained clean architecture with structure.

PROJECTS

AI-Powered HRMS | *Go, PostgreSQL, Gemini AI, JWT, REST API, HTML, CSS, JavaScript* [GitHub](#)

- Developed a full-stack HRMS JWT authentication, 4-role RBAC, and dashboards for employee management, attendance, leave approvals, and payroll processing.
- Built an AI recruitment pipeline using Gemini AI to parse resumes, evaluate candidates against job descriptions, and automate shortlisting through structured scoring.
- Implemented AI interview assessments with role-specific question generation, multi-dimensional answer evaluation, and fallback mechanisms for workflow reliability.

StoreX – Asset Management System | *Go, PostgreSQL, JWT, REST API, Firebase* [GitHub](#)

- Engineered a REST API for asset-lifecycle management across 5 asset types with PostgreSQL schemas, audit logging, automated migrations, JWT authentication, 5-role RBAC, and database-backed session management with instant token invalidation on logout.
- Scaled system to handle 10K+ asset records; paginated and filterable APIs reduced dashboard load time by 40% and maintained 100% audit traceability across all RBAC roles.
- Enforced business-rule-driven soft deletes, real-time dashboard analytics, and fault-tolerant fallback logic ensuring zero data loss on concurrent write operations.

ACHIEVEMENTS

- Research paper accepted at the **6th International Conference on Computational Methods in Science and Technology**.
- Smart India Hackathon 2024 National Semi-Finalist**.
- Solved 300+ Data Structures and Algorithms problems across LeetCode and competitive programming platforms.**
- Merit Scholarship recipient during BCA; District-level Volleyball Representative and School Team Captain.**

EDUCATION

Degree	Institute	Score	Year
MCA	Amity University, Noida(AIIT)	8.32 CGPA	2024–2026
BCA	DPG Institute of Technology and Management, Gurgaon	63%	2020–2023
Class XII	Sherwood Convent School, Gurgaon (CBSE)	77%	2020

CERTIFICATIONS

McKinsey & Company – Forward Program | Developing Secure Software | Java – Scaler
